--	---	-------------------------------------	---

PROFESSIONAL EXPERIENCE

Associate Software Developer (MERN Stack)

Nextupgrad Web Solutions | May 2025 – Present

- Develop and maintain full-stack web applications using MongoDB, Express.js, React.js, and Node.js
- Build responsive user interfaces with React.js and modern CSS frameworks
- Design and integrate RESTful APIs for seamless frontend-backend communication
- Collaborate with team members to implement new features and fix bugs
- Optimize application performance and improve user experience

MERN Stack Developer Intern

Techpile Technology Pvt Ltd | Sep 2024 – Apr 2025

- Assisted in developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js
- Worked on RESTful API integration and handled frontend-backend data flow
- Gained hands-on experience with MongoDB for database operations and schema design
- Collaborated with senior developers and participated in code reviews

PROJECTS

School ERP System

A full-featured enterprise-level web application to manage and automate school operations.

- Developed a comprehensive ERP system with 25+ modules, including student management, transport, library, exams, attendance, inventory (stock), SMS notifications, and user management
- Built a scalable frontend using Next.js, Redux, and React-Bootstrap for responsive and dynamic UI
- Developed backend services using Node.js and Express.js for handling business logic and APIs
- Designed and managed database architecture using MongoDB for efficient data storage and retrieval
- Implemented role-based access control for admins, staff, etc.
- Worked on end-to-end development, from requirement analysis to deployment

Slot Management & Resource Tracking System

Client: Airports Authority of India (Government Project)

Role: Frontend Developer || Duration: Dec 2025 – Present

- Developed and managed the complete frontend of a slot management and resource tracking system
- Built responsive and dynamic user interfaces using Next.js
- Integrated multiple APIs for real-time data handling and seamless backend communication
- Implemented role-based access control for admins, airport and airline .
- Collaborated with backend developers to ensure smooth data flow and feature integration

Hospital Management System

A web-based system for managing hospital operations with role-based access.

- Developed a role-based system for Admin, Doctor, and Patient functionalities
- Implemented patient features like appointment booking and scheduling
- Built dynamic and responsive UI using Next.js, Redux, and modern CSS frameworks
- Designed secure authentication and authorization for different user roles
- Integrated APIs for managing patient records, appointments, and doctor availability

EDUCATION

Diploma in Computer Science & Engineering

2021-2024

Feroze Gandhi Polytechnic, Raebareli

- Completed diploma with first division
- Started learning coding during this phase

Higher Secondary Education (12th)

2019-2021

S.G.I.C Ghorwara Raebareli.

- Completed 12th with first division
